

Green House Gas (GHG) Emission Report FY 24-25

The Granules GHG Emissions Report provides a comprehensive overview of the Granules India Limited (GIL) and subsidiaries (GPI, GUSA, GLS, GCZRO) greenhouse gas emissions, covering Scope 1, Scope 2, and Scope 3 categories.

As part of our commitment to reducing environmental impact, we have analyzed emissions directly under our control (Scope 1), such as fuel combustion in company-owned facilities and vehicles, as well as indirect emissions from purchased electricity, steam, and heating (Scope 2).

And Scope 3 emissions are accounted for, encompassing emissions across our entire value chain, from supplier activities to product use and disposal. Recognizing that Scope 3 emissions often represent the largest portion of our carbon footprint, we are working to collaborate with suppliers, optimize operations, and engage stakeholders throughout our supply chain.

Note: Category 11, 13, 14, 15 are Not Applicable, as this categories is not relevant to Granules business

Granules Scope 3 quantification methodology is aligned with the GHG accounting standard and ISO 14064, which provides guidance on the quantification and reporting of greenhouse gas emissions. Due to variations in data availability and the nature of each category, we have employed different methodologies for different categories

FY 24-25	Category	Unit	Granules (Standalone)	Granules (Subsidiaries)				Granules (Consolidated)
			GIL	GLS	GCZRO	GPI	GUSA	
SCOPE-1	Direct Emissions from Fuels	tCO ₂ e	57,414	155	42	1,893	145	59,649

GHG Quantification Methodology

SCOPE 1 - QUANTIFICATION METHODOLOGY

For calculating scope 1 emissions, we have included data pertaining to three categories:

Fugitive emissions from refrigerants

A 'purchase-based approach' has been used to arrive at the activity data for the consumption of refrigerants. To calculate fugitive GHG emissions, the Intergovernmental Panel on Climate Change (IPCC) and DEFRA emission factors have been referenced.

Stationary combustion

The key fuel sources considered for arriving at the activity data are furnace oil, coal, HSD, Natural gas, gasoline. To quantify emissions, the relevant guidelines from IPCC and Department for Environment, Food and Rural Affairs (DEFRA) have been referenced for emission factors.

Wastewater

Most of our Manufacturing units sending the Wastewater to Third party CETPs (common effluent treatment plants for treatment) for treatment and Disposal. Hence Emissions from Transportation

and Treatment of Effluent is captured at Relevant category of SCOPE-3 i.e Category 5:Waste Generated in Operations.

Biogenic Emissions

Biogenic emissions have been estimated for biomass-based fuels, specifically wood chips and bio-briquettes, used in our boiler operations. Activity data has been sourced from actual fuel consumption records. Emission factors for biogenic CO₂ have been referenced from the UK Department for Environment, Food and Rural Affairs (DEFRA) database.

These emissions are reported separately from fossil CO₂ emissions, in line with global greenhouse gas accounting standards.

SCOPE 2 - QUANTIFICATION METHODOLOGY

Scope 2 emissions data encompasses activity data from grid electricity consumption. We have adopted a location-based approach for selecting the emission factors, due to unavailability of source-specific emission factors. For the Estimation of Scope-2 Emissions, we have adopted emission factors published by Central Electricity Authority of India.

SCOPE 3 QUANTIFICATION METHODOLOGY

We have aligned our methodology to GHG accounting standard & ISO 14064 (Guidance on quantification and reporting of greenhouse gas emissions). Due to variation in data availability & nature of category, we have used different methodologies for different categories.

Scope 3 Category No	Scope 3 Category Description	Methodology
1	Purchased Goods and Services	Supplier-specific method (~ 85%) Hybrid method (~ 15%)
2	Capital Goods	Hybrid method Average-product method
3	Fuel- and Energy-Related Activities	Average-data method
4	Upstream Transportation and Distribution	Distance-based method
5	Waste Generated in Operations	Waste-type-specific method
6	Business Travel	Distance-based method
7	Employee Commuting	Fuel-based method
8	Upstream Leased Assets	Lessor-specific method
9	Downstream Transportation and Distribution	Distance-based method
10	Processing of Sold Products	Average-data method
11	Use of Sold Products	Not Applicable, as this category is not relevant
12	End-of-Life Treatment of Sold Products	Average-data method
13	Downstream Leased Assets	Not Applicable, as this category is not relevant
14	Franchises	Not Applicable, as this category is not relevant
15	Investments	Not Applicable, as this category is not relevant

Category 1 -Purchased Goods and Services

At Granules, the majority of our purchased goods and services emissions originate from Active Pharmaceutical Ingredients (APIs) , Key Startup Materials (KSMs), Solvents and Packaging materials .Key raw materials include PAP, Acetic Anhydride, DCDA, Ibuprofen and Metformin HCL Etc..

Methodology Used: Supplier-specific method & Hybrid method using the Primary and Secondary data.

Category 2 -Capital Goods

At Granules, the majority of our capital goods emissions originate from purchase of pharma manufacturing equipment's. Granules procures many capital goods that aid its operations of producing API, PFI and finished dosages. Key capital goods include compression machines, tablet printing machines, coating granulators, air receiver tanks etc.,

Methodology Used: Hybrid method & Average-product method using the Primary and Secondary data.

Category 3 - Fuel- and Energy-Related Activities

At Granules, we consume the electricity and fuels like Coal, HSD, Furnace oil etc in the manufacturing operations of pharmaceutical products. Hence, the majority of our Fuel and Energy related activities emissions originate from generation and transmission of electricity from grid and extraction, exploration, production and transportation of the fuels like Coal, Diesel, Furnace oil.

Methodology Used: Average-data method using the Primary data.

Calculation formula Upstream CO₂e emissions of purchased fuels (extraction, production, and transportation of fuels :

$\sum (\text{fuel consumed (e.g., kWh)} \times \text{upstream fuel emission factor (kg CO}_2\text{e)/kWh})$

Source of Emission Factors Used: India Specific Road Transport Emission Factors, India GHG Program, 2015 & Ecolnvent

Category 4 - Upstream Transportation and Distribution

At Granules, the majority of our upstream transportation and distribution emissions generated during the transportation of all materials like APIs ,RM ,KSMs ,Packaging materials etc used in our pharmaceutical product manufacturing. Majority of the suppliers of raw materials, packing materials and MRO (Maintenance, Repair & Operations) items used in the manufacturing of our products are situated in India and China. RM and PM are usually transported from the suppliers / traders' site by sea and road with air shipments constituting a small share of the inbound shipments.

Methodology Used: Distance-based method using the Primary data.

Calculation formula Distance-based method (transportation):

sum across transport modes and/or vehicle types:

$= \sum (\text{mass of goods purchased (tonnes or volume)} \times \text{distance travelled in transport leg (km)} \times \text{emission factor of transport mode or vehicle type (kg CO}_2\text{e/tonne or volume/km)})$

Source of Emission Factors Used: India Specific Transport Emission Factors, India GHG Program, 2015 & DEFRA

Category 5 - Waste Generated in Operations:

At Granules, the majority of our "Waste generated in operations" emissions generated during the transportation, treatment , disposal of Waste and Waste water generated in the pharmaceutical manufacturing process.

As a company that produces pharmaceutical APIs, PFIs and finished dosages, we generate and dispose waste under two categories namely liquid waste (effluent) and solid waste. Solid waste is further divided into sub-categories basis the chosen disposal methods.

Effluent waste undergoes primary treatment within Granules' premises and is then disposed to Central Effluent Treatment Plants (CETPs). The methods of treatment of various solid wastes are described below.

All the figures for absolute emissions include both emissions due to transportation of the waste to respective 3rd party treatment facilities and emissions due to treatment of the waste in such facilities

Methodology Used: Waste-type-specific method using the Primary Data

Calculation formula Waste-type-specific method:

$\sum (\text{waste produced (tonnes or m}^3) \times \text{waste type and waste treatment specific emission factor (kg CO}_2\text{e/tonne or m}^3))$

Source of Emission Factors Used: Ecolnvent, USEPA and other Emission factors from Secondary Research Reports

Category 6 - Business Travel

At Granules, the majority of our "business travel "emissions generated during the travelling (by road ,by train ,by air , including local travel by bus ,car ,auto etc) and staying during the business visits like meetings, conferences, site visits, and training sessions.

Primary modes of transportation used by employees during business travel are flights and cars for which company authorized travel service partners are available. Employees also use trains, buses and hotels during business travel for which they are reimbursed at actuals basis rules outlined in the company travel policy guidelines.

Methodology Used: Distance-based method using the Primary data

Calculation formula Distance-based method:

$\sum (\text{distance travelled by vehicle type (vehicle-km or passenger-km)} \times \text{vehicle specific emission factor (kg CO}_2\text{e/vehicle-km or kg CO}_2\text{e/passenger-km)})$

Source of Emission Factors Used: India Specific Transport Emission Factors, India GHG Program, 2015 & DEFRA

Category 7 - Employee Commuting

At Granules, the majority of our "employee commuting" emissions generated through employees travel between home and work places by various modes of transportation used by employees such as Company provided bus, employee owned vehicles like two wheeler ,car and public transport like bus, metro, train, auto etc.

Methodology Used: Fuel-based method & Distance-based method using the Primary data

Calculation formula Distance-based method:

total distance travelled by vehicle type (vehicle-km or passenger-km)

= $\sum$ (daily one-way distance between home and work (km) $\times$ 2 $\times$ number of commuting days per year)

Source of Emission Factors Used: India Specific Transport Emission Factors, India GHG Program, 2015 & DEFRA

Category 8 - Upstream Leased Assets:

At Granules, the majority of our 'upstream leased assets' emissions generated from Leased Ware houses, Guest house/Hostels, Laptops etc. Granules has taken warehouses, hostels and IT assets on lease basis. The emissions from the utilisation of these assets for operations of Granules been estimated in this category.

Methodology Used: Lessor-specific method using the Primary data

Calculation formula Lessor-specific method:

$\sum$ (scope 1 and scope 2 emissions of lessor (kg CO₂e) area, volume, quantity, etc., of the leased asset/ total area, volume, quantity, etc., of lessor assets)

Source of Emission Factors Used: India Specific Transport Emission Factors, India GHG Program, 2015, DEFRA & Ecolnvent

Category 9 - Downstream Transportation and Distribution

At Granules, The majority of our downstream transportation and distribution emissions generated during the transportation of Finished dosage formulations, Pharmaceutical formulation Ingredients (PFIs) and Active Pharmaceutical Ingredients (APIs). Majority of the customers of Granules India Limited are concentrated in Europe, Americas and Australia. Typical products include API (Active Pharmaceutical Ingredient), PFI (Pharmaceutical Formulation Intermediate) and Finished Dosage (FD) that are primarily shipped to customers via sea and air. For domestic customers, sales primarily comprise of API with a small portion of PFI which are transported via road.

Methodology Used: Distance-based method using the Primary data.

Calculation formula Distance-based method (transportation):**sum across transport modes and/or vehicle types:**

= $\sum$ (mass of goods purchased (tonnes or volume) $\times$ distance travelled in transport leg (km) $\times$ emission factor of transport mode or vehicle type (kg CO₂e/tonne or volume/km))

Source of Emission Factors Used: India Specific Transport Emission Factors, India GHG Program, 2015 & DEFRA

Category 10 - Processing of Sold Products:

Granules India Limited Manufactures Active Pharmaceutical Ingredients (API) and Pharmaceutical Formulation Intermediates (PFIs) which are sold to other pharma companies that transform them further into Finished Dosage (FD) for use by end consumers.

Methodology Used: Average-data method using the Secondary data.

Calculation formula Average-data method:

$\sum$ (mass of sold intermediate product (kg) $\times$ emission factor of processing of sold products (kg CO₂e/kg of final product))

Category 11 - End-of-Life Treatment of Sold Products

Granules India Limited sells a mix of Active Pharmaceutical Ingredients (API), Pharmaceutical Formulation Intermediates (PFI) and Finished Dosages (FD) to its customers. We have accounted for treatment of waste from processing of sold APIs / PFIs to FD by our customers. We have further accounted for the packaging waste disposed once finished dosages, produced by Granules India Ltd., are consumed by our customers.

Methodology Used: Average-data method using the Secondary data.

Source of Emission Factors Used: US EPA Emissions factors hub, 2023,

Exclusions:

Category 12 - Use of Sold Products: This category is not relevant to Granules operations, all the final products are consumed by the end users

Category 13 - Downstream Leased Assets: This category is not relevant to Granules as there are no downstream leased assets.

Category 14 - Franchises: This category is not relevant to Granules as there are no Franchises.

Category 15 - Investments: This category is not relevant to Granules as there are no Investments

UNCERTAINTY:

The GHG emissions reported for Scope 1, Scope 2, and Scope 3 include inherent uncertainties due to estimation methodologies and data limitations. For Scope 1 and Scope 2 emissions, which cover direct and energy-related emissions under our operational control, uncertainties are minimized through direct measurement and utility data; however, minor variability may occur due to the accuracy of fuel and electricity data collection methods

Scope 3 emissions reporting for Granules involves inherent uncertainties due to the complexity and variability of the data sources across the value chain. Since these emissions largely depend on activities outside Granules' direct control—such as supplier operations, product transport, and end-of-life treatment—estimating them accurately presents significant challenges. Data reliability issues, varying supplier reporting practices, limited primary data availability, and the use of industry averages or estimation models contribute to this uncertainty.

Granules recognizes these limitations and is committed to continuously refining its data collection and estimation processes. Through engagement with suppliers, adoption of advanced calculation methodologies, and leveraging of more accurate data sources, Granules aims to improve the accuracy of its Scope 3 inventory over time, thereby enhancing its alignment with the GHG Protocol requirements and supporting its broader sustainability goals.

Independent Assurance Report for BRSR and GRI Frameworks

INDEPENDENT ASSURANCE STATEMENT

To

The Management of Granules India Limited

Introduction and objectives of work

The Management of **Granules India Limited** (hereafter stated as “**Granules**” or the “Company”) have engaged Bureau Veritas (BV) for providing **Reasonable Assurance** engagement for BRSR (Core) parameters (**Refer to Annexure-1**) and **Limited Assurance** for non-core parameters (**Refer to Annexure-2**) provided in the Business Responsibility & Sustainability Report of the Company for the year ended March 31, 2025.

Intended User

The Assurance Statement is made solely for “Granules” and its stakeholders as per the governing contractual terms and conditions of the assurance engagement contract between “Granules” and “Bureau Veritas”. To the extent that the law permits, we owe no responsibility and do not accept any liability to any party other than “Granules” for the work we have performed for this assurance report, or our conclusions stated in the paragraph below.

The assurance engagement considers an uncertainty of $\pm 5\%$ based on materiality threshold for estimation / measurement errors and omissions.

Scope of Work

We have performed the **Reasonable Assurance** engagement as described in the Securities and Exchange Board of India's (SEBI) circular SEBI/HO/CFD/CFD-SEC-2/P/CIR/2023/122 dated July 12, 2023 & SEBI/HO/CFD/CFD-PoD-1/P/CIR/2024/177 dated December 20, 2024 and clarifications thereto, read with applicable SEBI Regulations and prescribed format, as amended, for BRSR (Core) parameters and **Limited Assurance** engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised) and in line with the requirements of Bureau Veritas's standard procedures and guidelines for external Assurance of Sustainability Reports, based on current best practice in independent assurance for the reporting period **1st April 2024 to 31st March 2025**.

The reporting boundaries considered for this reporting period are as follows.

<u>Site Name/ Location</u>	<u>Site Address</u>
CORPORATE OFFICE	15th Floor, Granules Tower, Botanical Garden Road, Kondapur, Hyderabad – 500084, Telangana, India.

API UNIT - V	Plot No. 30, J. N. Pharma City, Parawada Mandal, Anakapalli District – 531 019, Andhra Pradesh, India
FINISHED DOSAGE UNIT	160/A, 161/E, 162 & 174/A, Gagillapur Village, Dundigal Gandimaisamma Mandal, Medchal-Malkajgiri District – 500 043, Telangana State, India.
R&D Unit - 1	Plot No. 56, Road No. 5, ALEAP Industrial Area, Pragathi Nagar, Gajularamaram Village, Qutbullapur Mandal, Medchal-Malkajgiri District, Hyderabad – 500 072, Telangana State, India.
R&D Unit - 2	Survey Nos. 234/1 to 4 and 6 to 7, 235 /6 to 9 and 245/1 to 3, India Land Global Industrial Park, Hinjewadi Phase -1, Mulshi Taluka, Pune District – 411 057, Maharashtra State, India
R&D Unit - 3	H.No.5-33, Sy No.352, Plot No. 8, Road No. 2, ALEAP Industrial Area, Pragathi Nagar, Gajularamaram village, Qutbullapur Mandal, Medchal- Malkajgiri District, Hyderabad – 500 072, Telangana State, India.
R&D Unit - 4	Lab No: 11 & 13, Building No:1800, Sy No. 101,101/2 & 340, M. N. Park, Genome Valley, Lalgadi Malakpet Village, Shameerpet Mandal, Medchal- Malkajgiri District, 500 078, Telangana State, India

As part of its Independent Assurance, we assessed the appropriateness and robustness of underlying reporting systems and processes, used to collect, analyse and review the information reported. In this process, we undertook the following activities:

Assessment was conducted by means of physical site visits at Hyderabad's Corporate office, API Unit I, Finished Dosage Unit, R&D Units 3 & 4, API Unit IV & V.

Bureau Veritas interviewed personnel of Company including HR & Admin, EHS, Engineering & Maintenance, SCM, Finance & Accounts, Quality Assurance & Quality Control, Legal & Compliance, Information Technology and other relevant departments and review of Company's data & information systems for collection, aggregation, analysis and review.

- The assurance process involved carrying out an Assessment by experienced assessors from Bureau Veritas.
- The Company submitted performance data on reported BRSR Core Indicators. The data pertaining to selected sites was assessed by Bureau Veritas during the audit visit and through the process above described.
- Data on various BRSR Core disclosures was assessed for the locations as mentioned above. Later, it was confirmed that the same assessed data went into preparation of the final data within the BRSR Report of FY: 2024-25.

Management Responsibility

The Selection of reporting criteria, reporting period, reporting boundary, monitoring and measurement of data, preparation, and presentation of information in the Business Responsibility and Sustainability report are the sole responsibility of the Company and its management. We are not involved in drafting or preparation of BRSR (FY 2024-25). Our sole responsibility is to provide Independent Assurance on the Sustainability report for the financial year ended 31st March 2025.

Our findings

On the basis of our methodology and the activities described above,

- It is our opinion that Company has established appropriate systems for the collection, aggregation, and analysis of data on Sustainability/Non-Financial performance disclosures in the BRSR.
- The Business Responsibility and Sustainability Report (FY 2024-25) provides a fair representation of the Company's activities as included therein.
- The information is presented in a clear, understandable, and accessible manner, and allows readers to form a balanced opinion over the Company and status during the reporting period.

a) Reasonable Level of Assurance for BRSR (Core) Parameters:

On the basis of our methodology and the activities described above, it is our opinion that the for FY 2024-25 of "Granules India Limited", containing its reporting and declaration of the BRSR (Core) parameters from the operations within the reporting boundary and the reporting period, as described above, is prepared in all material respects in line with the applicable criteria here before stated and in accordance with "Reasonable Assurance" criteria.

b) Limited Level of Assurance for BRSR (Non-Core) Parameters:

Nothing has come to our attention to indicate that the BRSR (Non-Core) disclosures are inaccurate or that the information included therein is not fairly stated.

Limitations and Exclusions

Excluded from the scope of our work is any assurance of information relating to:

- Activities outside the defined assurance period.
- Positional statements (expressions of opinion, belief, aim or future intention by the Company and statements of future commitment).
- Competitive claims in the report claiming, "first company in India", "first time in India", "first of its kind", etc.

Our assurance does not extend to the activities and operations of the Company outside of the scope and geographical boundaries as well as the operations undertaken by any subsidiaries or joint ventures of the Company.

Our assurance on economic and financial performance data or information of the Company is based only on the annual audited statement of accounts of the Company for the Financial Year 2024-25 and our conclusions rest solely upon that audited report.

This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist within the Report.

Statement of Independence, Integrity, and Competence

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety, and social accountability with over 196 years history. Its assurance team has extensive experience in conducting assessment over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas operates a certified Quality Management System which complies with the requirements of ISO 9001:2015 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Bureau Veritas has implemented and applies a Code of Ethics, which meets the requirements of the International Federation of Inspections Agencies (IFIA), across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behaviour, and high ethical standards in their day-to-day business activities.

The assurance team for this work does not have any involvement in any other Bureau Veritas projects with Granules India Limited.

Competence

The assurance team has extensive experience in conducting assurance over environmental, social, ethical, and health & safety information, systems and processes an excellent understanding of Bureau Veritas standard methodology for the Assurance of Sustainability Reports.

Restriction on use of Our Report

Our Assurance report for Business Responsibility and Sustainability Report (Core and Non-core Parameters for FY 2024-25) has been prepared and addressed to the Management of Granules India Limited at the request of the company solely to assist the company in reporting on the Company's Sustainability performance and activities.

Accordingly, we accept no liability to anyone, other than the Company. Our deliverables should not be used for any other purpose or by any person other than the addressees of our deliverables. The Firm neither accepts nor assumes any duty of care or liability for any other purpose or to any other party to whom our Deliverables are shown or into whose hands it may come without our prior consent in writing.

INDEPENDENT ASSURANCE STATEMENT

To

The Management of Granules India Limited

Introduction and objectives of work

The Management of **Granules India Limited** (hereafter stated as "Granules" or the "Company") have engaged us to undertake an Independent Assurance of the company's Sustainability report for the financial year ended **31st March 2025 (i.e., Granules India Limited-Sustainability Report (FY 2024-25))** and provide **Reasonable Assurance** Statement on the aforesaid report. Granules India Limited has prepared the Sustainability Report with reference to Global Reporting Initiative (GRI) Standards, 2021 with stated parameters (**Annexure 1**) for the reporting period (FY 2024-25), based on which this overall assessment has been carried out. This Assurance Statement applies to the related information included within the scope of work described below.

Intended User

The intended user of this assurance statement is Granules India Limited. We disclaim any liability or responsibility to a third party for decisions, whether investment or otherwise, based on this assurance Statement. Bureau Veritas planned and performed the work to obtain the evidence, considered necessary to provide a basis for our assurance opinion.

The assurance engagement considers an uncertainty of $\pm 5\%$ based on materiality threshold for estimation / measurement errors and omissions. We did not engage with any external stakeholders as part of this assurance engagement.

Scope of Work

We have performed the **Reasonable Assurance** engagement for Sustainability report prepared with reference to GRI Standards 2021, verification engagement in accordance with ISAE 3000 methodology and in line with the requirements of Bureau Veritas's standard procedures and guidelines for External Assurance of Sustainability Reports, based on current best practice in independent assurance for the reporting period 1st April 2024 to 31st March 2025. The selected GRI disclosures referred to in Appendix – 1 for this statement.

The reporting boundaries considered for this reporting period are as follows.

<u>Site Name/ Location</u>	<u>Site Address</u>

R&D Unit - 3	H.No.5-33, Sy No.352, Plot No. 8, Road No. 2, ALEAP Industrial Area, Pragathi Nagar, Gajularamaram village, Qutbullapur Mandal, Medchal- Malkajgiri District, Hyderabad – 500 072, Telangana State, India.
R&D Unit - 4	Lab No: 11 & 13, Building No:1800, Sy No. 101,101/2 & 340, M. N. Park, Genome Valley, Lalgadi Malakpet Village, Shameerpet Mandal, Medchal- Malkajgiri District, 500 078, Telangana State, India

As part of its Independent Assurance, we assessed the appropriateness and robustness of underlying reporting systems and processes, used to collect, analyse and review the information reported. In this process, we undertook the following activities:

The assessment was carried out through physical site visits at Hyderabad's Corporate Office, API Unit I, Finished Dosage Unit, R&D Units 3 and 4, and API Units IV and V.

Bureau Veritas interviewed personnel of Company including HR & Admin, EHS, Engineering & Maintenance, SCM, Finance & Accounts, Quality Assurance & Quality Control, Legal & Compliance, Information Technology and other relevant departments and review of Company's data & information systems for collection, aggregation, analysis and review.

Data on various GRI disclosures were assessed for the locations that were visited. Later, it was confirmed that the same assessed data went into preparation of the final data within the Sustainability Report 2024-25.

Management Responsibility

The Selection of reporting criteria, reporting period, reporting boundary, monitoring and measurement of data, preparation, and presentation of information in the Sustainability report are the sole responsibility of the Company and its management. We are not involved in drafting or preparation of Sustainability Report. Our sole responsibility is to provide Independent Assurance on the Sustainability report for the financial year ended 31st March 2025.

Our findings

On the basis of our methodology and the activities described above,

- Nothing has come to our attention to indicate that the GRI disclosures are inaccurate or that the information included therein is not fairly stated.
- It is our opinion that Company has established appropriate systems for the collection, aggregation, and analysis of data on Sustainability/Non-Financial performance disclosures with reference to GRI.
- The Sustainability Report provides a fair representation of the Company's activities as included therein.
- The information is presented in a clear, understandable, and accessible manner, and allows readers to form a balanced opinion over the Company and status during the reporting period.

Limitations and Exclusions

Excluded from the scope of our work is any assurance of information relating to:

- Activities outside the defined assurance period.
- Positional statements (expressions of opinion, belief, aim or future intention by the Company and statements of future commitment).
- Competitive claims in the report claiming, "first company in India", "first time in India", "first of its kind", etc.

Our assurance does not extend to the activities and operations of the Company outside of the scope and geographical boundaries as well as the operations undertaken by any subsidiaries or joint ventures of the Company.

Our assurance on economic and financial performance data or information of the Company is based only on the annual audited statement of accounts of the Company for the Financial Year 2024-25 and our conclusions rest solely upon that audited report.

This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist within the Report.

Conclusion

Based on the procedures performed and the evidence obtained, nothing has come to our attention that causes us to believe that the sustainability disclosures in the Granule India Limited's Sustainability Report for the year ended 31-03-2025, prepared with reference to the GRI Standards 2021, are not fairly presented, in all material respects.

Statement of Independence, Integrity, and Competence
